About Fosun Apexvac

Fosun Apexvac (Dalian) Biopharmaceutical Co., Ltd., established in 2002, is a high-tech enterprise specializing in the research, development, production, and sales of preventive biological products. It also serves as a research base for National science and Technology programs in the biological field. In 2022, the company was recognized as one of the Top 100 Manufacturing Enterprises in Dalian and was awarded the title of National Gazelle Enterprise.

The company's currently marketed products include the Rabies Vaccine (Vero Cell) for Human Use, Freeze-dried, and the Influenza Vaccine (split virion), inactivated. With extensive experience in the production and research and development of viral vaccines, Fosun Apexvac possesses multiple independently developed technologies, including large-scale cell culture, virus amplification, vaccine purification, lyophilization, bioreactor, and serum-free culture technology, among others.

Driven by innovation, Fosun Apexvac continuously develops new

products to address a broader range of diseases. Its current R&D pipeline includes the Rabies Vaccine (Human Diploid Cell), Live Attenuated Varicella Vaccine, Herpes Zoster Vaccine, and MDCK Cell-Based Influenza Subunit Vaccine. To support the commercialization of these products, the company is constructing a new vaccine production facility. Upon completion, this new facility is expected to significantly increase production capacity and revenue, create nearly a thousand jobs, and foster the growth of Dalian's biopharmaceutical ecosystem.

Fosun Apexvac adheres to its core values of "Integrity and Trustworthiness, Customer First, Continuous Improvement, and Innovative Excellence." With the mission of "Providing High-Quality Vaccines for Human Health," the company is committed to enhancing product quality and advancing R&D capabilities, contributing to disease prevention, economic development, and societal well-being at both national and local levels.
